About us

Lignum Wood Floors was established in the United Arab Emirates in 2009.

Our passion is to enhance indoor and outdoor spaces with the elegance of high-end wood flooring.

We believe there is a better way to experience life!

Through the texture, colour to create an ambience that no other product than timber can deliver.

We have built a reputation for delivering quality products, expert installation, beautiful designs and are committed to make a difference and be a part of something bigger than ourselves.

Inspired by the beauty of nature, we specialize in high-end parquet and outdoor decks with the passion to deliver both small- and large-scale projects, in accordance with the leading wood floors Associations standards.

Installation

We provide a complete supply and installation service of parquet flooring, decking, staircases, cladding, ceiling and railings.

You can choose any type of floor for commercial, residential, sports floors.

We are using innovative, adjustable pedestals to elevate timber, composite or polymer decks with various assembly heights, aluminum substructure system, visible and hidden fastening..

Refurbishment

With time wood floors can sustain scratches, dents, general damage or it could be you simply require a change of colour, this doesn't mean that the floor needs to be replaced!

We make any old floor in homes, offices, sports halls, retail units, large public buildings, and wooden decking look brand new. With wood, the damage isn't permanent!

Cleaning

Wood flooring is a long-term investment, which with proper care gives an extra-strong, moisture resistant and easily cleanable surface.

We offer refreshing treatments and deep cleaning for hard waxed, oiled, lacquered floors, and outdoor wood decking.

The maintenance schedule for treatment will depend on how floors are used as there are 3 different types of maintenance; Domestic, Light Commercial and Public areas and each space has a different method and frequency.

Design

Design flooring, including wall and ceiling paneling is our specialty. We can provide you with a custom-made design to make your dream inspired by nature for living.

Our range runs from classic house planks via creative designs as mosaic, 3D, geometrical shapes to customers-specific special products.

Floors play a vital role in the aesthetics of interior design, given the surface area they cover and the resulting visual impression.
